BAREM RESEARCH WINS "EFFECTIVE PROJECT AWARDS 2019"

We are very proud to share news from our WIN partner [Barem Research](#). They were recently awarded the "Effective Project Awards 2019" in the SME category by the Republic of Turkey Ministry of Industry and Technology for their ClieTrack project.

While looking for innovative solutions in line with our digital era, they developed a new system for stakeholder satisfaction research, thus increasing the efficiency of the research itself and benefit the client as well.

187 organizations applied to the award and Barem was one of the 14 awarded.

Congratulations!

These are just examples of some initiatives developed by our members. Some of them could be replicated in different regions or could be the starting point for new WIN activities.
